**KDH Systems, Clinical Trial Patient Recruitment Innovator, Selected to Present at 11th
Annual C21 Bioventures Conference**

**KDH is the Single Technology Firm Invited to Participate at Exclusive Life Sciences
Investment Conference**

Napa, California—April 10, 2009 -- KDH Systems, Inc. presented their clinical trial patient recruitment solution at The 11th Annual C21 BioVentures conference, produced by Technology Vision Group LLC and hosted by BayBio, held April 7-9 2009, at the Meritage Resort in Napa, California. C21 is one of the most important meetings for private life science companies looking for suitable corporate partners and the industry's top investors.

[KDH Systems, Inc.](http://www.kdhsystems.com) is the only technology solution provider invited to present at C21. As stated by the C21 producers, Technology Vision Group LLC, "The development and growth of innovative young companies is dependent on their ability to attract investment, obtain corporate partners and create global commercial and technical networks. C21 focuses on providing the best opportunities to achieve these objectives, and for over a decade has helped many companies find commercial success."

"Our technology has been refined over the past few years in several sites, including University of California, San Francisco, (UCSF), screening over 300,000 patients of which 15,000 were successfully enrolled for clinical research. Our cost effective, automatic process can reduce time to trial as well as presenting thousands of previously unavailable candidates. *PatientLocate*SM, our clinical trial patient recruitment solution, is now ready for commercialization," said Dave Haddick, KDH CEO. "We welcome this opportunity to present at C21 to develop funding and partnership relationships."

About KDH Systems

KDH was founded in 2003 by industry professionals with a mission to innovate healthcare and clinical trials' processes. The company recognized that their technology could be applied to a critical biotech/pharmaceutical industry problem – reducing the time required and cost of clinical trials. KDH's goal is to create the world's most powerful, automated clinical trial matching platform to screen every hospital patient for every trial that is currently recruiting.

KDH's solution includes *PatientLocate*, with the capability to automatically screen all patients coming through hospital registration systems, and the *Global Health Network* (GHN) – connecting hospitals and clinics into a secure, global clinical trial site network. The GHN is an extension of KDH's patent pending *GOAL*TM core technology.
